

My name is Martin Sanchez, and I was born in 2000 in Narbonne.

I have a brother who is also in Montpellier.

After school, I started studying computer science at the IUT of Montpellier where I got my first diploma. After that I decided to continue studying at the university of Montpellier.

I come from a small village in the countryside, so at first I was not used to big cities.

In my free time, I like to practice sports like climbing, skateboarding, and some street workout.
